

VARTIKA VERMA

Durg, Chhattisgarh, India | +91-9340588098 | vermavartika58@gmail.com
linkedin.com/in/vartika20 | github.com/vartikaverma737

PROFESSIONAL SUMMARY

B.Tech Computer Science (Data Science) graduate who builds and deploys AI/ML solutions that turn business problems into predictive, data-driven decisions. Hands-on experience training CNN-based models (VGG16, MobileNetV2) to 92% accuracy, serving predictions through production-style Flask REST APIs, and optimizing real-time IoT data pipelines. Strong foundation in Python, SQL, statistical modeling, data visualization, and Generative AI, with a track record of translating raw data into actionable insights for stakeholders. Seeking an AI/ML Engineer or Data Scientist role focused on building, deploying, and monitoring scalable ML and GenAI systems that drive measurable business impact.

CORE SKILLS

Programming & Data: Python (Pandas, NumPy), SQL / MySQL, R (Basic)

Machine Learning & Statistics: CNNs (VGG16, MobileNetV2), Scikit-learn, Regression, Classification, Clustering, Statistical Modeling, Model Training & Evaluation

Data Analysis & Visualization: Power BI, Excel (Pivot Tables, VLOOKUP), Data Cleaning, Exploratory Data Analysis, Dashboarding

Deep Learning & Generative AI: GenAI Applications, Large Language Models (LLMs), Prompt Engineering, LLM Fine-tuning Basics, RAG Fundamentals, Basic NLP

Model Deployment & Engineering: Flask, REST APIs, Git/GitHub, IoT/MQTT Data Integration, Big Data Fundamentals

Tools & Platforms: Jupyter Notebook, Google Colab

PROFESSIONAL EXPERIENCE

Data Science / AI Intern — IIT Mandi, Himachal Pradesh

Feb 2025 – Jun 2025

- Trained and fine-tuned deep learning models (VGG16, MobileNetV2) on 8,000+ image samples, achieving 92% prediction accuracy to support data-driven decision-making.
- Designed and deployed 3 Flask REST APIs to serve real-time model inference, reducing manual reporting effort by 30% and improving stakeholder access to predictions.
- Diagnosed latency issues in an IoT sensor pipeline (MQTT) and re-engineered the data flow, cutting system response time by 40% and improving production reliability.
- Collaborated with mentors and researchers over a 5-month internship to translate open-ended business/research problems into structured ML solutions, from data collection through model evaluation.

PROJECTS

Smart Travel Planner for Chhattisgarh — AI-Based Recommendation System

- Built a machine learning recommendation engine covering 25+ destinations, using location and user-preference data to generate personalized itineraries and improve decision-making for end users.
- Cleaned and preprocessed real-world datasets of 5,000+ records, improving recommendation relevance by an estimated 20%.
- Automated end-to-end itinerary generation, cutting manual planning time by roughly 35%.

Amazon Sales Data Analysis — Power BI Dashboard

- Analyzed 12,000+ sales transactions to uncover revenue trends and customer purchasing patterns, delivering insights to support business decisions.
- Designed 6 interactive Power BI dashboards translating raw data into business insights for stakeholders.
- Streamlined the reporting workflow, cutting turnaround time by an estimated 25%.

EDUCATION

B.Tech in Computer Science (Data Science) — Chhattisgarh Swami Vivekanand Technical University, Bhilai

2022 – 2026

CBSE Class XII — Mother's Pride Higher Secondary School, Raipur

2021 – 2022

ACHIEVEMENTS

- Completed a Data Science/AI internship at IIT Mandi, achieving 92% model accuracy using deep learning models (VGG16, MobileNetV2) in IoT-based systems.
- Participated in a Data Analytics Hackathon at IIM Nagpur.
- Completed 240+ hours of National Service Scheme (NSS), demonstrating leadership and teamwork.
